

Performance Commentary

August was a month to forget for EM investors. The travails started as the Fed cut interest rates for the first time in a decade while downplaying hopes of a sustained easing cycle. The trade war escalated, and China let the yuan slip to the lowest level in a decade. EM currencies had their worst August in more than 20 years. Economic indicators are weakening, signalling that the drawn-out trade war is taking a toll. Policy makers globally are reducing rates, while the bond market is signalling deep worries. An extreme flight to safety has led to a hostile asset and sector rotation. With a cyclical overweight, this played to Kon-Tiki's disadvantage with energy/raw material related names suffering in particular. State Bank of India was weak on emerging concerns about a slowing external environment and resultant headwinds to asset quality and growth. Russian grocery retailer X5 delivered solid results while China Unicom got a welcome lift from talks of a 5G network share with China Telecom. The "yearly" labour strike at Hyundai seems to be resolved and results were promising. We expect certain politicians and central bankers to have a large say in short-term market developments. Kon-Tiki is a diversified portfolio with an overweight of companies driven by internal factors trading at a big discount to EM, at 2020e P/E of 7.5x versus 11x.

The fund selects low-priced, high-quality companies, mainly in emerging economies.

The objective is to provide the best possible risk adjusted return.

The fund is suitable for those with at least a five year investment horizon.

Important information

This report is intended for investment professionals only. The content is not to be viewed by or used with retail investors. Unless otherwise stated, performance data relates to class A units and is net of fees. AUM data as of the end of the previous month. Except otherwise stated, the source of all information is SKAGEN AS. Historical returns are no guarantee for future returns. Future returns will depend, inter alia, on market developments, the fund manager's skills, the fund's risk profile and subscription and management fees. The return may become negative as a result of negative price developments. You can download more information including subscription/redemption forms, full prospectus, Key Investor Information Documents (KIID), General Commercial Terms, Annual Reports and Monthly Reports from our local websites or our local representatives. Statements reflect the portfolio managers' viewpoint at a given time, and this viewpoint may be changed without notice. This report should not be perceived as an offer or recommendation to buy or sell financial instruments. SKAGEN AS does not assume responsibility for direct or indirect loss or expenses incurred through use or understanding of this report. Employees of SKAGEN AS may be owners of securities issued by companies that are either referred to in this report or are part of a fund's portfolio.

The benchmark index is the MSCI EM Index (net total return), this index did not exist at the inception of the fund and consequently the benchmark index prior to 1/1/2004 was the MSCI World AC Index. This is not reflected in the table/graph above which shows the MSCI EM Index since the funds inception.
